

CROVEN CRYSTALS

MILITARY AND SPACE PRODUCTS

CROVEN CRYSTALS has been a leading supplier of precision quartz resonators for space, military and other hi-rel applications since the 1960's. Our crystals can be found in the deepest regions of space and the most hostile environments closer to home. Complete in house testing capabilities enable us to provide full qualification and reliability assurance processing for the most demanding applications.

In addition we have been QPL approved since 1967 and offer a full range of standard crystals per MIL-PRF-3098. A list of the existing standard parts is included below.

ITAR COMPLIANCE and CLASSIFIED PROGRAMS

For products and information governed by ITAR regulations CROVEN CRYSTALS maintains registration with the Canadian Controlled Goods program which enables our customers to take advantage of the ITAR exemptions as proscribed under 22 CFR 126.5. This makes it very easy to transfer ITAR related materials and documents from and to our facility.

In addition CROVEN CRYSTALS has valid site security clearances recognized by the United States Department of Defense which enable us to provide services for programs where clearances are required.
